

WHAT IS probax?

DATA CENTRES

Global storage and processing in Perth, Melbourne, Sydney, South Africa, London, North America. Disaster Recovery currently available in Australia

MULTI-TENANT BACKUP PLATFORM

Probax allows users to monitor and verify all their backups in one place

USER-FRIENDLY INTEGRATIONS

Probax integrates with your backup software of choice to accommodate your requirements. Integrations include: ShadowProtect®, Veeam®, NAS and FilePlus.

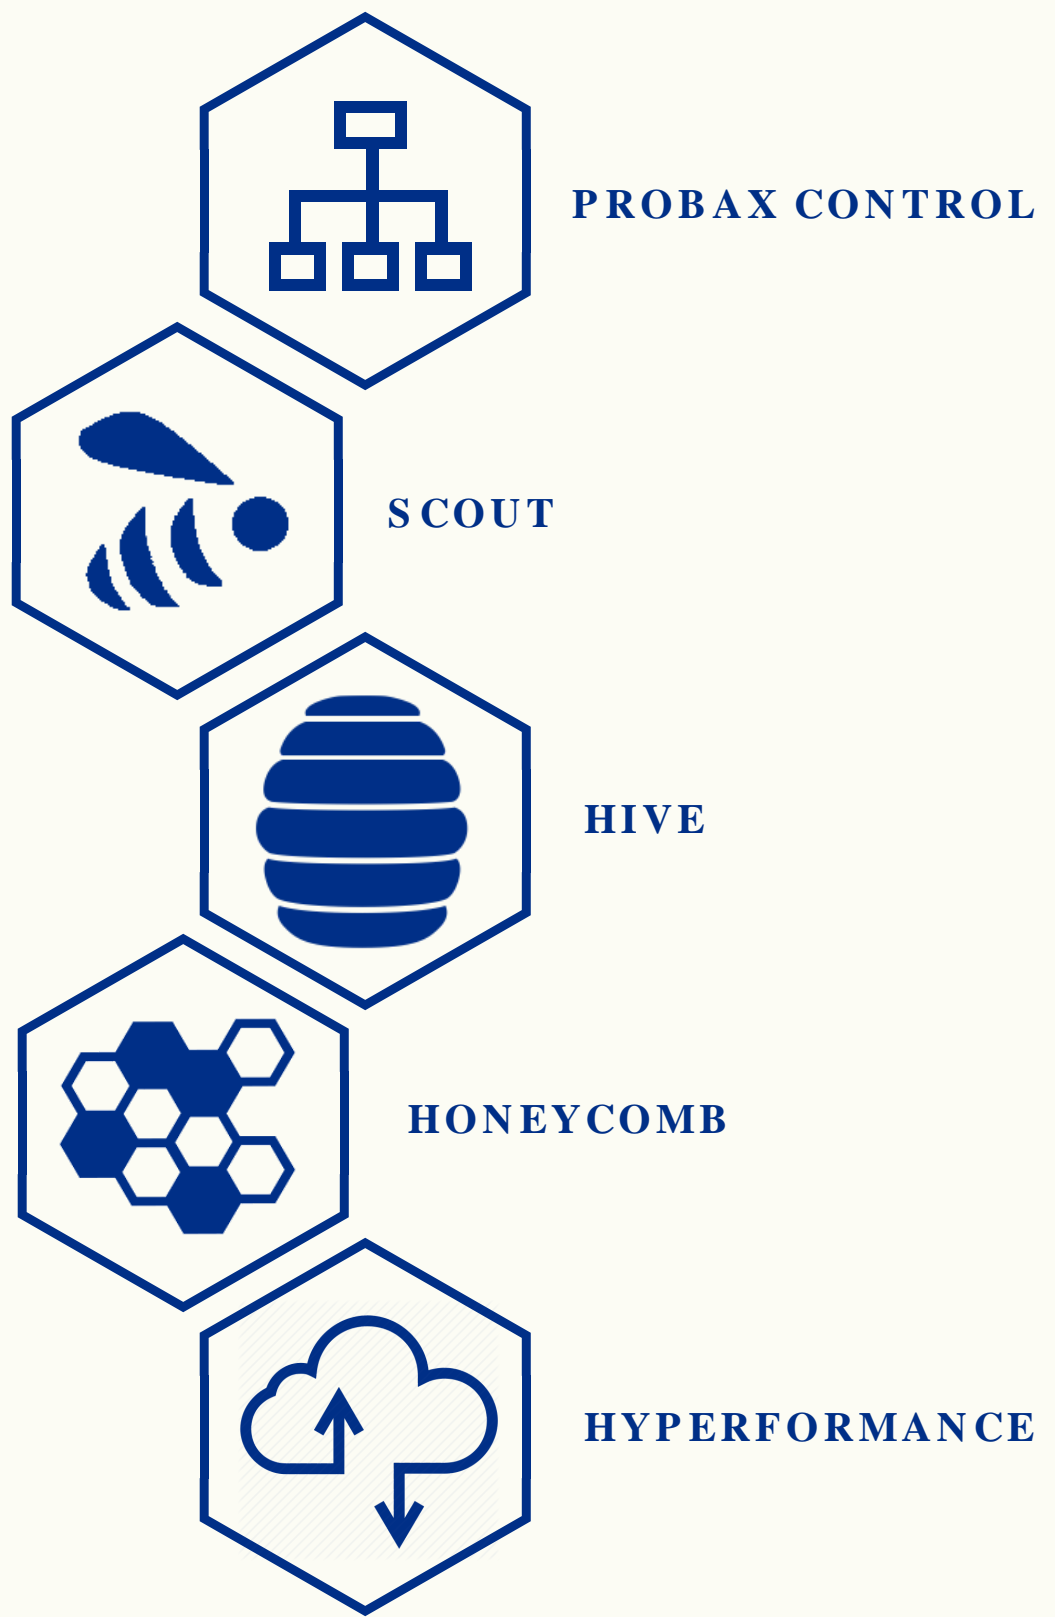

THE FUTURE OF CLOUD BACKUPS

Using Probax Control, a purpose built end-to-end backup & disaster recovery suite as the storage and monitoring tool for cloud backups; managing your clients' backups becomes much faster, simpler and easier.

PRODUCTS

A MARKET LEADING SUITE OF TECHNOLOGY THAT HAS MADE PROBAX A LEADING CLOUD BACKUP & DISASTER RECOVERY SPECIALIST

YOUR DATA IS SECURE

SAFETY & SECURITY A PRIORITY

SECURE TRANSFER PROTOCOLS

ONGOING DATA VERIFICATION

TOP LEVEL DATA CENTRE CERTIFICATIONS

MULTIPLE REDUNDANCY & RESILIENCY MEASURES

SEGREGATION OF CLIENT DATA

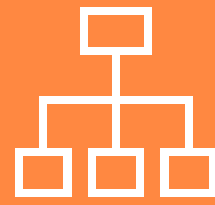

PRODUCT SYNERGY

A GLOBAL SUITE OF CUSTOMISED SOFTWARE AND INTEGRATIONS WHICH HARMONISE FOR SIMPLIFIED MANAGEMENT.

CONTROL

The Probax Control dashboard gives you more power to manage client backups. This advanced dashboard provides intuitive guidance for what important fixes are required. Application-aware verification and reporting on Veeam, ShadowProtect and File backups; all in one dashboard for complete Control.

SCOUT

Scout is a Probax-designed application which provides a link between our cloud storage and the End User's local backups. This allows us to automatically identify and fix common backup problems and ensure the End User has a healthy backup chain.

HIVE

Have a Hive working for you. This exclusive hardware device is distinctly simple, but only on the outside. On the inside, it houses ample storage for your backup and disaster recovery needs. Sophisticated, and effortless in all the right ways.

HONEYCOMB

Honeycomb is your Virtual Tape Storage solution. Create long-term archive points that are "air-gapped" from your primary storage and resilient to malicious or accidental deletions. Tapes are created directly from your primary storage so there is no extra data to transfer.

HYPERFORMANCE

Take your backups to the Hyperperformance level. Purpose-built to handle a high-volume of daily incremental changes generated in the Probax Partner Network. With greater processing power, the automated verifying, merging and consolidation of ShadowProtect and Veeam files is done with greater agility.

INTEGRATIONS

SHADOWPROTECT®

ShadowProtect® is a standalone software product by StorageCraft® which allows backup and hardware independent restores of entire volumes and systems. Our system acts as a Replication Target and provides advanced cloud reporting and automation

 StorageCraft VEEAM

VEEAM®

Veeam® enables fast Cloud-based Disaster Recovery-as-a-Service through Probax data centres, maximising the hybrid cloud. These form extremely resilient offsite backup and recovery solutions. Veeam offers efficient image-based VM replication delivers and true cloud-based disaster recovery for all applications (RTPOs < 15 minutes) as well as agent-based backups for Servers and Workstations.

FILEPLUS

FilePlus is Probax's free backup software for small business clients. FilePlus performs file-level backups of Files, Folders, Exchange & SQL databases.

NAS DEVICE BACKUP

Replicate files and folders from Network Attached Storage with Probax. Teams using NAS for on-site file sharing rely heavily on this system. Remove the risk of losing access to critical files with a complete backup of your clients' NAS devices.

DISASTER RECOVERY

PROBAX ALLOWS YOU TO REPLICATE VEEAM® PROTECTED SYSTEMS AND TURN THEM ON IN OUR INFRASTRUCTURE

Veeam® enables fast cloud-based DRaaS (Disaster Recovery-as-a-service) through Probax data centres; embracing virtualization and storage investments, extending them throughout the hybrid cloud.

When combined with Probax for off-site replication, they form an extremely resilient backup and recovery solution. Veeam® offers efficient image-based VM replication and delivers true cloud-based disaster recovery for all applications (RTPOs < 15 minutes). All of this, with the added benefit of easy licensing.

Advanced, image-based VM replication through Veeam® CloudConnect is simple to set up and easy-to-use

- A cloud host for DR with CPU, RAM storage and networking resource allocation
- **Full site and partial site failover** to the Probax DR site from anywhere with just a few clicks
- **Failback** to restore normal business operations
- **Built-in network extension appliances** to simplify communication with/between running VMs, regardless of location
- **1-click failover orchestration** for quick execution
- Single-port connectivity via a **secure, reliable TLS/SSL connection**

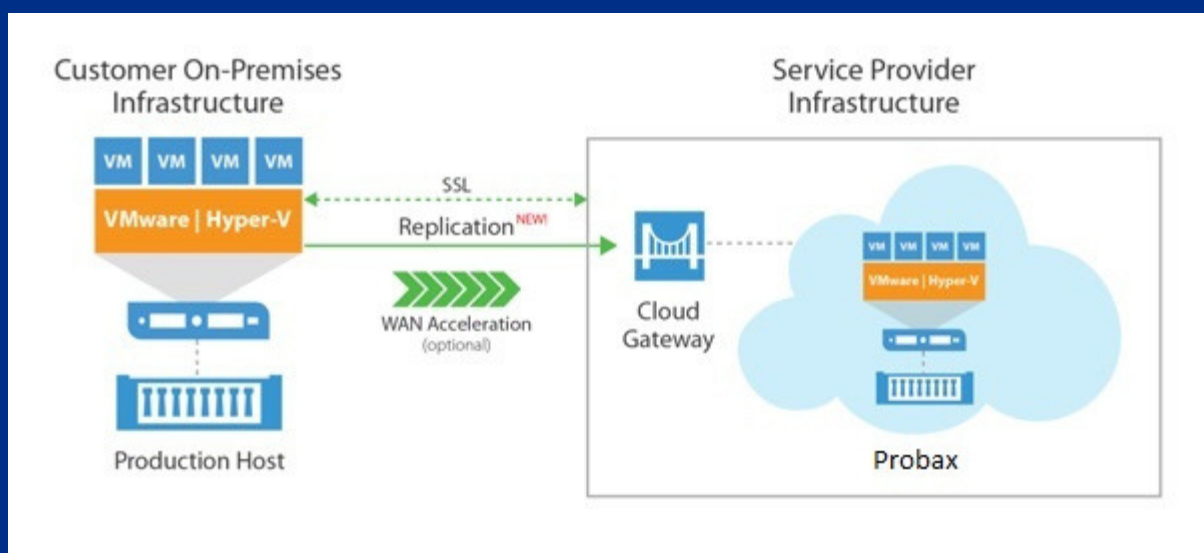

In harmony with the Probax Control dashboard Veeam® files are interrogated to produce detailed reports on your backups

These Include:

- The system hostname
- The VM name, IP address and operating system
- Compression and deduplication
- The restore points available in the backup set
- The type of backup, whether it be part of the regular restore points or an archived point such as weekly, monthly, etc

MASTER BACKUPS AND AVOID CATASTROPHIC DATA LOSS

*Follow the 3-2-1 rule:
3 copies of your data
on 2 types of media,
with 1 copy stored off site*

Take your Smart Safe Local Cloud to the next level
