

AWP is the leading provider of secure online file sharing and collaboration services to more than 150,000 paying businesses worldwide. Autotask Workplace enhances productivity by empowering mobile teams and organisations to do business faster from any device anywhere.

In business every second counts: Our vision is of a world where teams of professionals can securely access and manage their work from any device at any time to *do business faster*.

With AWP, we are dramatically more productive on the road. Files are automatically synced and ready for use from anywhere. It's just what we needed to keep up with our growing business."

MOBILE COLLABORATION

Anywhere, anytime access to the most up-to-minute business content empowers employees to make better and more informed decisions to help drive the business forward faster. Autotask Workplace facilitates optimised content delivery and rendering on any type of business content from their preferred mobile device. With the Autotask Workplace One-App™ concept and Team-based sharing ensures that corporate content stays in the right hands.

ENTERPRISE-GRADE SECURITY

Critical business content needs to be secured. Policy-based control of content, seats, and devices is paramount to maintain corporate security. Autotask Workplace is an enterprise-grade service that has 99.9+% uptime with stringent levels of security certifications including HIPAA, SSAE16 and PCI. With geo-redundant data centers in North America, Europe and Canada, AWP adheres to local regulations for data in all major regions of the world.

PURPOSE-BUILT FOR BUSINESS AND USERS

Autotask Workplace is flexible and open, designed for the specific needs of IT departments in larger companies where control and management of cloud services is critical to business operations. With policy-based control of content, seats and devices, providing secure access for employees and partners to work together on Projects with the proper controls is a top priority.

Autotask Workplace Plan Overview

Autotask Workplace Pro Plan

A Better Way to Work

3+ Team Members Seats

1 TB of Online Storage

The ability to do more with your files allows you to do more business and provide better client service — wherever business takes you.
